PATROL PC® | RHINOTAB® MX4

(3:2 High-Res Screen Shown)

Reliable MDT Performance. Streamlined for Value.

Configurable MDT Platform for Cost-Effective Fleet Deployment

The RhinoTab® MX4 is a purpose-built mobile data terminal designed to deliver reliable performance in a streamlined, cost-effective platform. Built for agencies seeking essential functionality without unnecessary overhead, the MX4 offers flexible configuration options while maintaining dependable field-ready performance. With support for key in-vehicle workflows, connectivity, and essential peripherals, the MX4 is ideal for departments standardizing deployments at scale. It is fully compatible within the RhinoTab® ecosystem and backed by the same trusted support and warranty coverage customers rely on.

System Overview

- **Designed for Fast, Consistent Deployment** across large fleets
- **Configurable Design** for cost-effective fleet deployment and standardization
- **Streamlined MDT Platform** designed for first responder field operations
